

# Civil & Structural Engineering

Full-service engineering from concept through construction

**Cantos Inc.** civil and structural engineering services build on a clear understanding of existing conditions and coordinated systems.

## Civil Engineering

Planning, design, and coordination of site and infrastructure systems.

### Services

- Project management
- Feasibility and assessment studies
- Site and roadway design
- Drainage and hydrology design
- Utility systems coordination and design
- Sanitary and septic design
- Subdivision and infrastructure design
- Construction services
- 3D visualizations
- Geographic Information Systems (GIS)

## Structural Engineering

Engineering solutions focused on safety, performance, and constructability.

### Services

- Feasibility studies and preliminary design
- Structural analysis and design
- Steel, concrete, masonry, and wood systems
- Static and dynamic load analysis
- Seismic, wind, snow, and hurricane-force design
- Construction documents and BIM
- Construction administration
- Value engineering

## At a Glance:

### What it is:

Integrated civil and structural engineering services supporting infrastructure and building projects.

### What you get:

Code-compliant, constructible engineering designs aligned with project goals, budget, and schedule.

### What it supports:

Planning, design development, permitting, construction, and project completion.
